CHISELLING

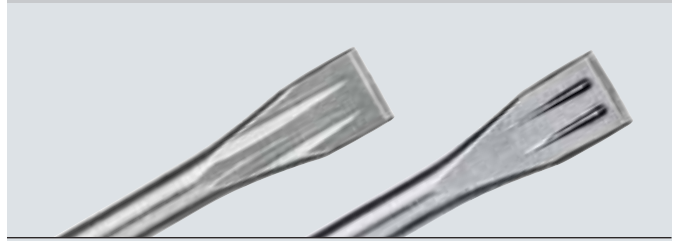

THE NEW GENERATION OF SDS-PLUS CHISELS

Pointed chisel SDS-plus

- ▶ The new pointed chisel with twisted tip and self-sharpening function enables more efficient working and reduces jamming in concrete.

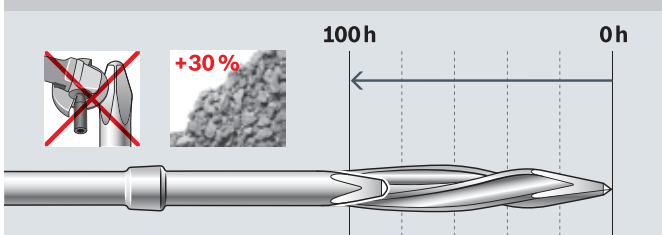

Flat chisel SDS-plus

- ▶ Self-sharpening grooves on the front, which produce lateral and vertical cracks. These prevent jamming in concrete.
- ▶ Continuation of the successful "Viper Teeth" design on the back.

PROVEN SDS-MAX CHISELS

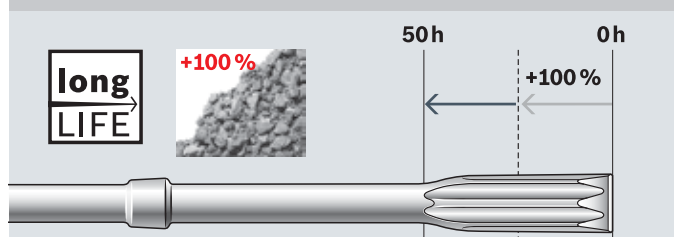

Pointed chisel SDS-max

Increased power output

- ▶ No jamming
- ▶ Lifetime of 100 hours
- ▶ 30% higher material removal rate than standard pointed chisels

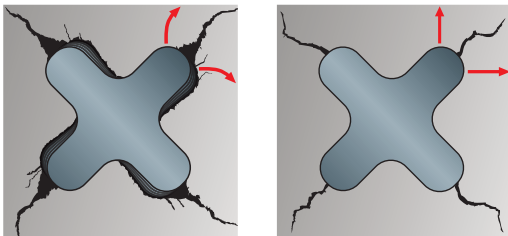

Flat chisel SDS-max

Double material removal rate

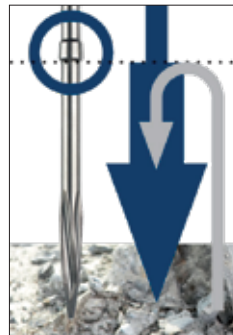

- ▶ 100% longer lifetime
- ▶ Self-sharpening cutting edge
- ▶ Double material removal rate

High blast power

Greater material removal

Additional impact energy

- ▶ The patented reflection element increases the power output: the recoil energy is converted into additional impact energy
- ▶ For an increase in material removal

As a provider of universal solutions, Bosch offers the self-sharpening function not only in existing SDS-max chisels, but also for selected chisels with the SDS plus shank system.
